Managed Security Services

Managed Security Services for Healthcare

ETSec MSS helps healthcare providers such as labs, physicians and hospitals with:

- ⚡ Safeguarding sensitive patient information
- ⚡ End-to-end security management
- ⚡ 24x7x365 network monitoring
- ⚡ Streamlined IT infrastructure
- ⚡ Secured remote access, data delivery & printing
- ⚡ Remote and onsite support & help desk

Providing Healthcare Organizations with Flexible, Powerful and Cost-Effective Protection

Today's organizations face an unprecedented barrage of threats, attacks and intrusions. IT departments could spend every waking hour just trying to stay on top - much less ahead - of the dynamic threat environment they face. With statutes such as HIPAA, government initiatives like HITECH and the National Healthcare Information Network and the growing adoption of EMR systems, the healthcare industry is firmly intertwined with IT as it transforms itself for the 21st century.

ETSec Managed Security Services Let Healthcare Providers Focus on the Patient

Managed security services provide an ideal option for physicians, hospitals and clinical labs that need to secure their networks and safeguard their data – without having to become IT experts. ETSec provides a full suite of managed security services and consulting services to ensure security and regulatory compliance throughout the organization.

By knowing that appropriate security safeguards and regulatory compliance processes are in place due to ETSec's thorough assessment, review, deployment and execution methodologies, healthcare organizations can focus on patient care and leave IT security to the experts.

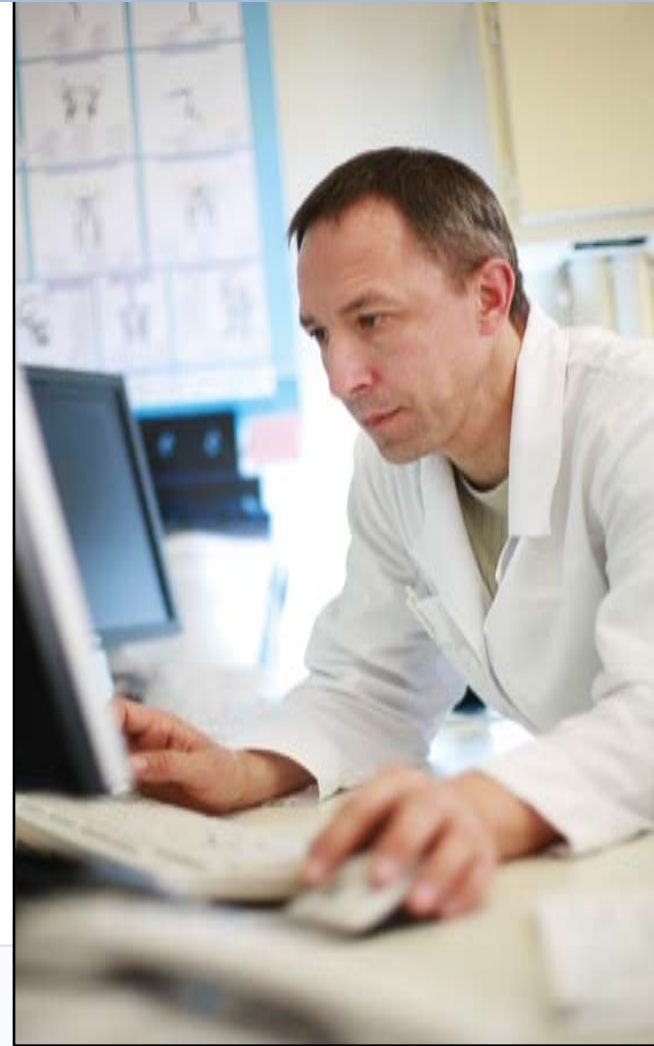

ETSec Managed Security Services

Helping Healthcare Safeguard Critical Patient Data

ETSec's managed security service (MSS) offerings provide end-to-end management of healthcare organizations' security needs through the remote management of their network and information systems.

We provide all members of the healthcare community with best-in-class network security solutions and consulting, while also offering patented data delivery solutions that are in use in clinical labs and physician offices around the US. We are uniquely equipped to provide healthcare organizations with solutions that:

- ⚡ **Protect centralized and distributed network endpoints**
- ⚡ **Secure the transmission and data delivery of patient information**
- ⚡ **Confirm and track patient health data in real-time**
- ⚡ **Provide dashboard tracking of patient data for providers**
- ⚡ **Enable compliance with HIPAA and HITECH**

ETmanage™

Comprehensive Managed Network Security

Our ETmanage offerings, which we can provide individually or as a comprehensive solution for end-to-end security management, include the following services:

ETmanage™ Firewalls - 24x7x365 management and support of corporate enterprise firewalls

ETmanage™ IDS/IPS - 24x7x365 management and support of corporate intrusion detection / prevention systems

ETmanage™ Proxy Content Filtering/Anti-Virus/Instant Messaging - 24x7x365 management and support of corporate proxy security systems

ETmanage™ Network Access Control - 24x7x365 management and support of corporate network access control systems

ETmanage™ Anti-Spam - 24x7x365 management and support of corporate email spam protection systems

ETmanage™ Anti-Malicious Code - 24x7x365 management and support of anti-malicious code protection (both email and web) including anti-SPAM, malware, spyware and phishing both in appliance and cloud-based services

ETmanage™ Security Incident Event Management (SIEM) - 24x7x365 management and support of Security Incident Event Management Response for regulatory compliance reporting or SIEM for real-time management, business continuity and incident response

ETassist™

Customized Help Desk and Onsite Support Services

With ETassist™ customized help desk and onsite support services, ETSec has developed customizable, competitively priced, certified help desk/support along with onsite support service offerings. These services encompass the majority of the security solutions that ETSec has rigorously tested in our Certified Lab, including Firewalls, IDS/IPS, SIEM, Proxy, DLP and others.

Our help desk/support team is staffed by certified, experienced security and networking experts who possess an average of 15-25 years of experience in administering corporate security in Fortune 500 organizations. In addition, we pride ourselves in a model that allows customers to reach a Level-3 equivalent support member at the initial engagement; there is no longer a need to escalate up to appropriate support levels for problem resolution. We put you there at the start.

Features:

- ❖ Certified security expertise
- ❖ Global 7x24 service operations centers and data centers
- ❖ First call to Level-3 support; 8x5 or 7x24 options
- ❖ 30-minute guaranteed response time
- ❖ Named customer advocate & senior security engineer
- ❖ Scheduled conference calls & onsite visits
- ❖ Guaranteed 4-hour onsite Level 3 support
- ❖ Complimentary licensing & renewals management

ETmonitor™

24x7x365 IT Security Monitoring

ETmonitor™ provides real-time monitoring and analysis of network environments, offering enhanced risk management and protection for information assets. ETSec has the capabilities to investigate security incidents using advanced query and analysis tools. By analyzing security incidents from alert and log data, ETSec acquires a deep understanding of your network environment as it relates to threat activity to your environment.

Through secure encrypted connections, client security devices or aggregation points – including firewalls, network-based intrusion prevention systems (IPS) and intrusion detection systems (IDS), host-based IPS and IDS, integrated security appliances, desktop firewall/IPS/IDS, and other devices and applications – are monitored and analyzed by ETSec security specialists 24 hours a day, every day.

Features:

- ❖ 24x7x365 monitoring of corporate enterprise firewalls / routers / switches, VPN systems, intrusion prevention / detection systems, proxy content filtering, network access controls systems, networking/security devices, incident management, incident escalation, and rapid response to outbreaks
- ❖ Management-style dashboard view into your environment including statistics on devices being monitored, access to alert data and log data
- ❖ Centralized ability to generate reports on device status

ETvpn™

Managed Virtual Private Networks

ETvpn is a cost-effective method of connecting and securing data transfers between your offices and remote employees. This scalable service adapts to any IT environment and ensures the security of your Internet-based communications. With ETvpn, we offer three managed service options to best suit your needs, including SSL and IPsec.

Your ETSec VPN infrastructure is monitored via our Security Operations Center Helpdesk and is available 24x7x365. Our security engineers review all changes in security policy while you maintain control of changes and have full visibility into your network through detailed reporting and metrics.

Features:

- ❖ **Proactive monitoring, tracking, and response to VPN performance and outages**
- ❖ **Notification and dynamic reporting of VPN activities and incidents**
- ❖ **Proactive security services that provide guidance before a security vulnerability occurs**

Cloud Services

Connecting & Protecting Distributed Healthcare Networks

In order to solve the challenges posed by the distributed, disparate nature of Healthcare Providers, ETSec also offers products and managed transaction delivery services to ensure the secure and reliable delivery of clinical data between entities such as clinical labs, hospitals and physicians.

Leveraging ETSec's patented secure data delivery platform technologies, our end-to-end ETSec's End-to-End Management Solutions include:

- ❖ **ETprint™ - Outsourced result report delivery system with dashboard result tracking for real-time proof of result delivery**
- ❖ **ETpilot™ - A versatile secure gateway to deliver lab results via network, dial-up, Bluetooth, EMR**
- ❖ **ETnavigator™ - Dashboard fleet management system providing real-time status of print hardware located in physician offices**
- ❖ **Managed Print Services - Turnkey subscription-based report delivery service**
- ❖ **ETshared-Services - Allows multiple labs to subscribe through a single ETSec-managed footprint within the physician office**

About ETSec

ETSec is a global information security company dedicated to providing end-to-end management of an organization's enterprise security needs. In addition to state of the art Managed Security Services and deep security expertise, ETSec delivers new levels of security to the extended enterprise. By combining the managed services delivery model with the concepts of SaaS and Cloud Services – and ETSec's patented solutions, ETSec is defining the next generation of enterprise security with unprecedented reliability, efficiency and manageability.
